Workshop 15

Edison Lascano PhD

Inspected by Group 7 (Codex)

Anghelo Suntaxi

Daniel Sangoquiza

Denis Paucar

NRC: 36862

Artifacts:

- 100 GitHub: Edison
- 10 Definition self explanatory
- 10 List of possible objects: at least 10 well defined objects
- 10 SRS IEEE 830: completeness
- 10 Product Backlog: at least 9 features that computes something (-1)
- 10 UML class diagram: classes and relationships
- 10 UML use case diagrams: use cases and actor
- 10 Clean code: list of pitfalls and inconsistencies with UML
- 10 Test cases/unit tests: at least 90 running unit tests
- 10 Data files JSON: system is persistent through time
- 10 Data reports: CSV: generates reports of data (at least two reports)
- 100 Execution of features: run every feature. (-1)

Team 1: Logical Lords
Project: Liquor store system
Leader: Isaac Acurio
Github: https://github.com/DemianArmas/System-Liquor-Store.git

Inspector team 7, inspector leader: Anghelo Suntaxi

Project Deliverables Evaluation

Artefacto	Max Points	Criteria / Description	Score	Notes
GitHub	100	Edison		
Definition	10	Self explanatory	accomplish	
List of possible objects	10	At least 10 well defined objects	accomplish	
SRS IEEE 830	10	Completeness	does not comply	Regarding the maximum and minimum stock levels, the program should not allow the minimum stock to be set higher than the

Artefacto	Max Points	Criteria / Description	Score	Notes

				maximum, as this causes confusion.
				`Código del producto: 12341`
				`Nuevo nombre: Jack Daniel´s`
				`Nuevo costo unitario (USD): 2.50`
				`Nuevo precio de etiqueta (USD): 4.00`
				`Nuevo stock mínimo: 10`
				`¿Actualizar estos datos? (s/n): s`
				`Producto actualizado. Las ventas anteriores conservan s`
				`ALERTA: 12341 - Jack Daniel´s. Stock: 7, mínimo: 10`

Product Backlog	10	At least 9 features that computes something (-1)	does not comply	Some product backlog items do things that can be attached, or they overlap/repeat.
UML class diagram	10	Classes and relationships	accomplish	
UML use case diagrams	10	Use cases and actor	accomplish	
Clean code	10	List of pitfalls and inconsistencies with UML	does not comply	It contains several comments—some of them obvious—in parts of the code. 
Test cases/ unit tests	10	At least 90 running unit tests	accomplish	
Data files JSON	10	System is persistent through time	accomplish	
Data reports: CSV	10	Generates reports of data (at least two reports)	does not comply	The CSV file is only updated, not saved as a new file; if I save certain dates one day and then close the program, a new file is

Artefacto	Max Points	Criteria / Description	Score	Notes
				not created the next day—the existing one is updated instead.
Execution of features	100	Run every feature (-1)	accomplish	
Total Points	**200**			

There are several comments in some sections (-0.1)

Product Backlog (-1)

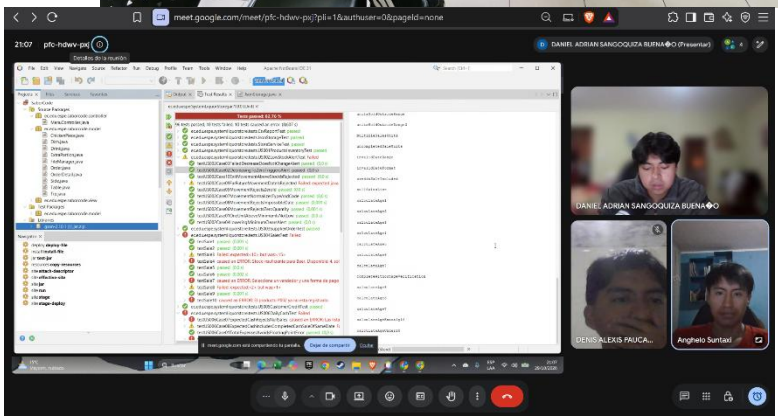

SRS IEEE 830: The code causes confusion regarding minimum and maximum stock levels when entering ranges (-0.1)

Data reports (CSV): The CSV file only performs updates; it does not save data (-0.1)

Grade: 8.7
